# About this template

Every qualification on a registered training organisation's (RTO's) scope of registration must have documented training and assessment strategies and practices. This training and assessment strategy (TAS) document is a dynamic document that is updated whenever strategies and practices change. It must be of an auditable standard, containing verifiable information that meets the requirement of the *Standards for Registered Training Organisations (RTOs) 2015*.

## Who should use it

The Queensland Curriculum and Assessment Authority (QCAA) has provided this standardised document for use in Queensland school RTOs.

Other people or organisations who want to use QCAA materials must obtain permission, as stated in the QCAA copyright notice available from [www.qcaa.qld.edu.au/copyright.html](http://www.qcaa.qld.edu.au/copyright.html).

Queensland school RTOs may use this document to assist with their quality assurance processes and systematic monitoring of RTO operations as outlined within the *Standards for Registered Training Organisations (RTOs) 2015*. These standards form part of the VET Quality Framework.

## How to use it

Customise the information in this TAS to represent the RTO's current policies and practices, involving RTO manager/s (RTOM), the Principal, trainers/assessors and industry representatives.

For all sections, replace sample or grey text with information representative of the RTO's ongoing practices. Follow the notes below to complete the TAS. Detailed guidance is provided in each section.

| Section                              | Notes for completion   |
|--------------------------------------|--|
| 1 Program overview                   | All input fields must be amended to reflect current RTO policies and practices for the delivery of the qualification.  |
| 2 Core and elective components       | Must always include sufficient units to be awarded a qualification. Optional delivery arrangements for units must be clearly explained in table 2.2.   |
| 3 Program assessment details         | Must include the complete proposed learning program. This may be amended at any time.  |
| 4 Work experience                    | When work experience is a requirement, it is mandatory to enter a summary of the work experience arrangements.   |
| 5 Trainers and assessors             | This checklist is a summary of information already held by the RTO supporting trainer and assessor suitability and must always be completed. Assessment-specific requirements must be clearly explained in the subsection. |
| 6 Physical resources and environment | Must be a summary statement identifying access to assessment resources.  |
| 7 Industry engagement                | All input fields must be populated. Engagement must include a meaningful summary of the industry representatives' comments and/or recommendations.   |
| 8 Register of assessment tools       | Before validation, list and briefly describe the total population of assessment tools that were used to make judgments of competency for this qualification.   |
| 9 Systematic validation              | Validation processes, arrangements, criteria and outcomes must be recorded.  |
| 10 TAS implementation checklist      | Checklist must be used to confirm TAS is ready for implementation.   |
| 11 Systematic monitoring             | Checklist and notes must be used at intervals determined by the RTO to confirm monitoring outcomes and actions.  |

## Section 2 Core and elective components

List the units that are going to be delivered and assessed as part of this strategy. Engage with industry to confirm the relevance of elective units selected, and record this in Section 7.

**Relevant Standards:** 1.1, 1.2, 1.4, 1.7, 1.8(a), 1.12, 3.5, Schedule 5

**Note:** A prerequisite unit may be delivered through an integrated approach with the secondary unit — it does not have to be fully completed before starting the secondary unit. However, to satisfy formal requirements, the prerequisite unit must be signed off prior to the secondary unit.

## Section 3 Program assessment details

**Relevant Standards:** 1.1, 1.2, 1.3(c), 1.8, 2.1, 2.2, 5.2

Use this section to record an outline of the proposed learning program for this qualification. Provide a brief summary of each intended assessment activity, its duration and the units it is fully or partially drawn from, and list the evidence-gathering tools to be used. Detailed mapping does not have to be recorded here. Update this section as you improve or change the program. Engage with industry to confirm the program's relevance and briefly summarise this in Section 7.

Before you start developing assessment tools, consider how learning and assessment are usually integrated, with assessment evidence being collected and feedback provided to the student throughout the learning and assessment process. Holistic training and assessment brings together a number of units of competency — relevant to the industry sector, workplace and job role — into a cluster (group) that reflects actual workplace practices. Any units that relate to a job function can be combined, and assessment tools designed to gather evidence in an efficient and effective assessment process. Industry sees this approach as realistic and essential for both delivery and assessment.

### 3.1 Developing assessment tools

Use these six steps to develop your assessment tools.

1. Read through the units of competency making up the qualification to understand all their requirements. Make notes on any specific requirements like foundation skills not explicit in the performance criteria, assessment conditions, and performance frequencies and knowledge evidence.
2. Develop and document a series of assessment activities that reflect the performance and knowledge demonstrated by a competent person in this industry. In the document describe the context of the activities and include clear and comprehensive instructions to the trainer, assessor and student. A casual reader of the activity document should easily identify what has to be done, when, where and to what standard.

Summarise each of these assessment activities in Section 3.4.

3. Develop a set of evidence-gathering tools for each assessment activity. Include instructions to the assessor and student on how they are to be used. All assessment techniques basically fall into the following categories:
  - direct observations of student activity
  - questions — written, online or direct (verbal)
  - reviews of things a student produces (e.g. project work, folios, artefacts, online materials, services).

In addition, there may be third party written reports.

List these assessment tools in Section 3.4.

4. Develop a single mapping or benchmarking tool to establish validity for all assessment tools identified in this TAS. It will indicate the relationship between the requirements of the unit/s of competency, the activities and evidence gathered.

Record the unit/s for which partial or complete evidence will be gathered in Section 3.4.

5. Develop a student profile. Each student must have their own profile that has provision to record outcomes for units of competency. As a minimum the profile must include:
  - student and assessor identification
  - dates or date ranges for completions
  - all units of competency the student is enrolled in, including code and title of qualification
  - a relevant final outcome on exit, e.g. Competent, Not Competent, Credit Transfer, Recognition of Prior Learning (RPL), Withdrawn
  - name of RTO
  - student year level.

You may optionally include a relevant interim outcome while gathering evidence, e.g. sufficient/insufficient or satisfactory/unsatisfactory.

The final outcome is used when updating student management records. Outcomes are recorded toward the end of the program when the assessor is satisfied there is enough valid evidence.

6. When this qualification is due for validation, ensure that Section 8 is completed and the assessment tools, including the mapping tool, are available for validators.

## 3.2 Student work

The assessment tools may not result in the production of tangible student work. This should not concern validators or assessors. Competency-based assessment is substantially reliant on direct observation and questioning evidence being gathered while an assessment task is being undertaken.

The principle of validity includes the requirement that assessment of knowledge and skills is integrated with their practical application. Assessment by practical application results in assessment tools that may produce both tangible and intangible evidence of students' skills and knowledge. Observations and direct questions do not produce tangible evidence, whereas products, artefacts and folios do. Assessment tools producing both types of evidence should be validated.

For both types of evidence, validators must analyse the decision-making rules. The decision-making rules are the lists of observations, acceptable answers and product/artefact/folio specifications used by the assessors to make judgments on evidence that is seen, heard or produced.

## Section 4 Work experience

Use this section to outline any work experience arrangements. The RTO must disclose to the student before enrolment, in print or electronic copy, whether work experience is a requirement to successfully complete the qualification. Under the legislation, a work experience arrangement must be in writing and 'must be made before the student starts a work experience placement' (*Education (Work Experience) Act 1996*, effective as of November 2014). Engage with industry to confirm the relevance of work experience and record this in Section 7.

Whether work experience is compulsory or not, are the following conditions met:

- Is there a written agreement between the work experience provider and the RTO?
- Will the work experience provider offer realistic workplace experience relevant to this program?
- Has the work experience provider agreed to complete written third party reports for each student?

**Relevant Standards:** 1.1, 1.5, 1.6(a), 1.8, 2.1, 5.2, 8.5

## Section 5 Trainers and assessors

Summarise the verifiable information from the staff profiles of your trainers and assessors. They must have relevant vocational competency at least to the level being delivered and assessed; relevant, current industry skills; current knowledge and skills in vocational teaching and learning; and hold the required training and assessment qualification. The RTO must hold verifiable evidence that each of its trainers and assessors meet the requirements. Engage with industry to confirm the relevance of their skills, and record this in Section 7.

For any units that are completed with the assistance of a third party, also identify the name of the third party against these units in Section 5.1.

In Section 5.2:

- detail how any supervision arrangements are implemented and systematically monitored
- include details of any specialised trainer and/or assessor qualifications or experience requirements identified by the units of competency
- describe any arrangements made for this RTO's trainers/assessors to work with another RTO or any other third party in order to provide training and assessment services to students.

**Relevant Standards:** 1.3(a), 1.6(b), 1.13, 1.14, 1.17–1.20, Schedule 1

| 5.1 Trainers and assessors   |                        |   |                                     |                                     |   |                                     |

## 5.1 Trainers and assessors

The RTO is required to have 'evidence to demonstrate that each trainer and assessor has the necessary TAE training and assessment competencies and the relevant vocational competency and industry currency for each VET unit of competency that they deliver and assess.

This is a summary — details must be recorded in the staff profile document of each trainer and assessor.

| Unit of competency code and title   | Trainer/assessor names | Individual delivers under supervision and holds skill set | Holds TAE40116 or successor         | Trainer/assessor currency held      | Relevant vocational competency held for each unit | Relevant industry currency held     |

## 5.2 Program-specific trainer and assessor requirements

|  |   |
|--|---|
| <b>Supervision</b>   | Level of supervision and monitoring arrangements (must be completed if 'Individual delivers under supervision' is selected in Section 5.1)  |
| Only an individual with vocational competency and industry currency and holding one of the Trainer Skill Sets of Schedule 1 Item 4 of the Standards is permitted to deliver training under the supervision of a person who also holds competency, currency and formal trainer qualifications.  | For all cases where an individual (with vocational competency and industry currency) is training under supervision, identify which Trainer Skill Set is held; describe the level of supervision and how assessment outcomes are determined.<br>Name the trainer/assessor accountable for monitoring and assessment. This person must also hold competency, currency and formal trainer/assessor qualifications.   |
| <b>Specialisations</b>   | Unit of competency specified trainer and/or assessor requirements   |
| List the names of the trainer and assessor and explain how they meet any of the specialised trainer/assessor requirements.<br>Describe any program-specific requirements and detail how the named trainers/assessors meet these. The unit of competency 'assessment requirements' section identifies industry, qualification, experience or other trainer/assessor requirements. | <i>Example of assessor requirements for:</i><br><br><i>MEMPE003A Use oxyacetylene and soldering equipment — Name of trainer and assessor holds MEM05022 Perform advanced welding using oxyacetylene welding process, date issued and RTO code. Details recorded in the trainer and assessor profile.</i><br><br><i>SITHIND003 Use hospitality skills effectively — Name of trainer and assessor has worked in industry for xx years, date/date ranges, name of company/business, contact details. Details recorded in the trainer and assessor profile.</i> |
| <b>Industry experts and others</b>   | Trainer/assessor working with another RTO or third party, or details of the services being provided for delivery or assessment of units by engaging a third party   |
| Summarise this RTO's obligations under the agreement, for example, setting out which party will provide the training and assessment materials, resources and facilities, and who will issue the certificates or statements of attainment.  | Describe any arrangements made for this RTO's trainers/assessors to work with another RTO or a third party to provide specific training and assessment services to students.  |

## Section 6 Physical resources and environment

Detail the provision of and access to specific resources to meet the delivery and assessment requirements of the units of competency and training package. Engage with industry to confirm the relevance of resources and record this in Section 7.

**Relevant Standards:** 1.1, 1.3(c), 1.4, 1.6(a), 1.7, 1.8, 2.1, 2.2

| <b>Summary statement identifying assessment resources</b>   | Assessment will take place within an environment where each student has individual access to a computer, a key tool in today's environment for building, maintaining and executing financial literacy.  |
| <b>Details and explanation of program-specific resources required by the units of competency or training package to successfully complete the program</b> | Supportive learning tools and resources from the real-world organisations such as the ATO, Money Smart, Bank websites etc. will be utilised extensively with the intention of educating students on the benefits of accessing such tools in life after school, which is particularly important for students with lower levels of literacy and numeracy who may not have the skills required to develop tools such as a budget themselves. |
| <b>Range of conditions or other specifically named resources or conditions for training and assessment</b>  | A suite of PowerPoints covering each unit of competency have been developed to cover all aspects of the course.   |
| <b>Learning resources to enable learners to meet the requirements for each unit of competency</b>   |   |
| <b>Assessment conditions resources identified by the units of competency</b>  |   |

# Section 7 Industry engagement

Use this section to briefly summarise each industry representative's comments and/or recommendations used in developing this strategy. Check each of the industry relevance statement boxes. Record what the RTO has done/will do to implement the recommendations from industry engagement. Engagement can be through emails, phone conversations, personal visits or online. More than one industry representative should be engaged, and three for qualifications at AQF 3 or higher. Re-engage with industry when major changes have been made to this TAS and record the event.

## Section 8 Register of assessment tools

This section should be completed prior to the qualification being validated. It is not required when applying to add a qualification to scope. All RTOs must have a five-year validation plan that covers all qualifications on scope. List and briefly describe the total population of assessment tools that contribute to making judgments for this qualification. Validators will use a selection from this list. Check the validated 'Yes' box in Section 8 after a tool has been validated.

The sample size selected for validation must be large enough to enable reasonable judgments to be made on the quality of the assessment tools used to gather evidence of competency for this qualification. Individual assessment tools usually map to multiple units, but the RTO must validate sufficient tools to fully cover a minimum of two units of competency. Record these two units by code and title in Section 9.2. This is an audit requirement.

Validators will need to review the mapping tool and a sample of the assessment project/activity/task documents, the related evidence-gathering tools and the student profile documents in order to successfully complete validation for this qualification. The review questions are found in Section 9.3.

Validators also analyse the methods — that is, the documented assessment projects/activities/tasks undertaken by the students — used to obtain evidence. The assessment methods must align with the performance criteria of the units of competency making up the qualification. The evidence gathered while the student was undertaking the activity must meet the Rules of Evidence and the requirements of the units of competency, and must ensure consistent application by assessors.

The qualification's benchmarking or mapping tool should be analysed by validators to determine whether the assessment tool content and decision-making rules are mapped to the performance criteria (and foundation skills when not implicit) and other assessment requirements of the units of competency. Mapping tools can be used to determine whether sufficient assessment was undertaken to enable judgments to be made on student competency. Assessment tools can map to parts or all of a cluster of units or a single unit. It is likely that validation of assessment tools will cover multiple units of competency.

## Section 9 Systematic validation

This section explains how to conduct validation and systematically record auditable-quality information on the outcomes and resulting actions. The table below is a summary of the five validation steps. Validation of a sample of assessment tools is done at least once every five years.

**Relevant Standards:** 1.8, 1.9, 1.10, 1.11, 2.2(a), (b)

## 9.2 Instructions for RTOM and validators

The RTOM confirms which assessment tools will be validated, verifies the suitability and credentials of the validators and ensures that validation records are completed. The completed validation records should be archived for audit. Student work may or may not be available for validation (see Section 3.2 Student work). The mapping tool should be used to confirm the minimum validation requirement that assessment tools map to at least two units of competency.

| 9.2 Validation instructions for RTOM and validators  |   |
|--|---|
| #  | Description   |
| 1  | Complete Section 9.1 to record the validation approach details and the names of validator/s. Supplementary information, such as validator profiles and the Validation Plan, should be kept.   |
| 2  | Select from Section 8 of the TAS a sample of assessment tools of sufficient size and type to be representative of all assessments tools used for this qualification.  |
| 3  | Provide the TAS, selected assessment tools (and relevant student work if available), mapping tool/s and student profiles for the validators. Any assessors directly involved in the use of the tools must not undertake the validation of those assessment tools. |
| 4  | The mapping tool/s must confirm that assessment tools selected for validation cover at least two complete units of competency. For audit purposes, record the two units in the table below.   |
| 5  | Use Section 9.3 as a guide when analysing and evaluating the effectiveness of each type of assessment tool for gathering evidence, making judgments and compliance with the Principles of Assessment and Rules of Evidence.                                       |
| 6  | Check 'Yes' (pass) or 'No' (fail) in Section 9.5 for each assessment tool selected for validation.  |
| 7  | For every assessment tool, record comments supporting the decision as well as any recommendations for improvement. See Section 9.4 as an example of how to complete Section 9.5.  |
| 8  | Complete Section 9.5 by recording the person/s involved, action taken and dates recommendations were implemented.   |
| 9  | Archive the completed validation records for this qualification in preparation for audit.   |
| <b>Recommended requirement:</b><br>Validate assessment tools fully covering at least two complete units of competency. |   |

## 9.3 Assessment tool analysis questions

| 9.3 Assessment tool analysis questions  |  |
|---|--|
| Numbered analysis questions below will help validators to decide whether to check 'Yes' or 'No' in Section 9.5, and to explain any issues identified and frame recommendations for improvement. |  |
| Validation requirements   | Check assessment tools against the following questions:  |
| <b>Validity in principle and by rule</b>  | <ol style="list-style-type: none"> <li>1. Are the assessment tool decision making rules mapped to the performance criteria (and foundation skills when not implicit) and assessment requirements of the units of competency? [Rules of Evidence]</li> <li>2. Does the assessment tool gather evidence of skills and knowledge through integration with their practical application? [Principles of Assessment]</li> <li>3. Does the assessment tool clearly describe and comprehensively explain how the project/activity/task is to be undertaken? [Principles of Assessment]</li> <li>4. Does the assessment project/activity/task require competent performance across a range of situations? [Principles of Assessment]</li> </ol> |
| <b>Reliability</b>  | <ol style="list-style-type: none"> <li>5. Does the assessment tool provide sufficient instructions to the assessor on how to manage the project/activity/task assessment requirements?</li> <li>6. Are the decision-making rules used when gathering evidence unambiguous and not open to interpretation?</li> <li>7. Does the project/activity/task document provide sufficient instruction and guidance to the student?</li> <li>8. Has a review of student work (where available) indicated consistency of assessment judgment outcomes?</li> </ol>   |
| <b>Fairness</b>   | <ol style="list-style-type: none"> <li>9. Does the assessment tool provide clear information for the student on the project/activity/tasks to be undertaken and how evidence will be gathered?</li> <li>10. Does the assessment tool include advice to the student on how to provide additional evidence to address performance and knowledge gaps?</li> <li>11. Is there an assessor feedback provision included in the assessment tools? Feedback includes provision to identify for the student performance and knowledge gaps and how to address them.</li> <li>12. Does the assessment tool provide advice to students on how to appeal decisions through direct feedback to the assessor?</li> </ol>                             |
| <b>Flexibility</b>  | <ol style="list-style-type: none"> <li>13. Is there provision for reasonable adjustments and is it simply explained in the assessment tools?</li> <li>14. Have a range of projects/activities/tasks been used and are they identified in the mapping tool and TAS?</li> <li>15. Is the context of the project/activity/task relevant to the units of competency as identified by mapping to the performance criteria and assessment requirements?</li> <li>16. Has RPL has been offered to students and any appropriate credit taken into account as stated in the TAS?</li> </ol>   |
| <b>Sufficiency</b>  | <ol style="list-style-type: none"> <li>17. Does the mapping tool identify that sufficient assessment tools are being used to gather evidence to enable a judgment to be made on student competency?</li> <li>18. Is only relevant evidence for assessment being gathered?</li> <li>19. Has the quality of decision making rules been confirmed by mapping to units' requirements?</li> </ol>   |
| <b>Authenticity</b>   | <ol style="list-style-type: none"> <li>20. Is provision made on the assessment tool to identify the student and assessor?</li> <li>21. Is provision made on the assessment tool to confirm that the evidence is authentically the students?</li> </ol>   |
| <b>Currency</b>   | <ol style="list-style-type: none"> <li>22. Are there date ranges on all assessment tools identifying when the projects/activities/tasks were undertaken by the student as well as the date ranges when evidence was gathered by the assessor?</li> <li>23. Does the date evidence confirm evidence is from the present or very recent past?</li> </ol>   |

# Section 11 Systematic monitoring

Evidence of systematic monitoring of training and assessment strategies and practices to ensure ongoing compliance with the Standards is an auditable and essential requirement.

The RTOM will record the dates when monitoring activities occur and update the outcomes to indicate compliance or rectifications pending. Up to four monitoring dates can be recorded. The most current date represents the most recent monitoring activity compliance record.

**Relevant Standards:** 1.20, 2.1, 2.2, 2.4
