

Testimonial from Xinyue Tao, Senior 2020

My name is Xinyue Tao. I am a current student of University of Queensland, studying Bachelor of Dental Science (Honours). I graduated from Centenary Heights State High School (CHSHS) spending the last two years of my high school life in this wonderful school. My experience at CHSHS was very positive and rewarding.

Teachers and peers (students) were friendly, helpful and welcoming from my first day. The warm and safe environment not only helped me to adjust quickly to the new environment but also led to my academic success. Centenary Heights State High School is a diverse school and it was here that I made many friends from different countries with various cultural backgrounds. The cultural diversity enriched my life and widened my vision. The International student program is definitely the highlight of the school. Teachers often organize fun activities to enrich our experience in Australia such as taking us on excursion every term, organizing international food, and camping activity, etc. These activities provided us with opportunities to view the magnificent natural scenery of Australia, to deepen our understanding of Australian culture and practice our skills of communication, team work and problem-solving. In brief, I truly enjoyed the time that I spent at Centenary Heights State School and would like to thank every teacher and friend that helped me. If I had a chance to choose my high school again in Australia, Centenary Heights State High School would definitely be my first choice.
